

IN THE CLAIMS:

Please amend claims 14, 20, 31, 38, and 39, as set forth below.

Claims 1-13 (Canceled)

14. (Currently Amended) A system for creating web documents, comprising:
an output display device, the output display device displaying:
C (a first list of objects, the first list of objects including a predefined HTML
object for inclusion in a web page;
a second list of objects displayed simultaneous with the first list of objects, the
second list of objects including a user defined HTML object for inclusion
in a web page;
a view window for displaying a web page comprising one object from one of
the first and second lists of objects; and
an input device, the input device selecting the one object from one of the first and
second lists of objects for display in the page.

15. (Canceled)

16. (Previously Presented) The system of claim 14, wherein the first list of objects
and the second list of objects are displayed in a palette window.

17. (Previously Presented) The system of claim 14, wherein the input device is a mouse.

18. (Previously Presented) The system of claim 14, wherein the input device is a keyboard.

19. (Previously Presented) The system of claim 14, wherein the output display device further displays an object editor window, the object editor window displaying a list of properties associated with the one object.

20. (Currently Amended) A method of creating a web document, comprising:
displaying a first list of objects on a display device, the first list including a predefined HTML object for inclusion in a web page;
simultaneously displaying a second list of objects on the display device, the second list of objects including a user defined HTML object for inclusion in a web page;
receiving input from an input device selecting an object from one of the first and second lists of objects; and
displaying a view window on the display device, the view window containing a web page including the selected object.

21. (Previously Presented) The method of claim 20, wherein receiving input from an input device selecting an object from one of the first and second lists of objects comprises a mouse clicking on the object in the one of the first and second lists of objects.

22. (Previously Presented) The method of claim 20, further comprising displaying the first and second lists of objects in a palette window on the display device.

6 23. (Previously Presented) The method of claim 20, wherein the user defined HTML object is created from the predefined HTML object.

24. (Previously Presented) The method of claim 20, wherein the user defined HTML object is created from another user defined HTML object.

25. (Previously Presented) The method of claim 20, further comprising:
receiving at the input device input selecting an object from one of the first and second lists of objects for modifying a property associated with the object;
displaying in an object editor window in the display device a value of the property associated with the object; and
receiving at the input device input modifying the value of the property associated with the object.

26. (Canceled)

27. (Canceled)

28. (Previously Presented) The method of claim 25, wherein receiving input comprises receiving at the input device input selecting the object for modifying the property from a collection of objects in the web page displayed in the view window on the display device.

29. (Canceled)

30. (Previously Presented) The method of claim 21, wherein displaying the web page in the view window on the display device, including the selected object, comprises the mouse dragging the selected object from the one of the first and second lists of objects and dropping the selected object in the web page.

31. (Currently Amended) An article of manufacture comprising a computer usable medium having computer readable program code means embodied therein for causing a processor to generate and display a web document, comprising:

computer readable program code means for displaying a first list of objects on a display device, the first list of objects including a predefined HTML object for inclusion in a web page;

computer readable program code means for simultaneously displaying a second list of objects on the display device, the second list of objects including a user defined HTML object for inclusion in a web page;

computer readable program code means for receiving input from an input device selecting an object from one of the first and second lists of objects; and

computer readable program code means for displaying a view window on the display device, the view window containing a web page including the selected object.

32. (Previously Presented) The article of manufacture of claim 31, further comprising computer readable program code means for displaying the first and second lists of objects in a palette window on the display device.

33. (Previously Presented) The article of manufacture of claim 31, further comprising computer readable program code means for creating the user defined HTML object from the predefined HTML object.

34. (Previously Presented) The article of manufacture of claim 31, further comprising computer readable program code means for creating the user defined HTML object from another user defined HTML object.

35. (Previously Presented) The article of manufacture of claim 31, further comprising:

computer program code means for receiving at the input device input selecting an object from one of the first and second lists of objects for modifying a property associated with the object;

computer program code means for displaying in an object editor window in the display device a value of the property associated with the object; and

computer program code means for receiving at the input device input modifying the value of the property associated with the object.

36. (Canceled)

37. (Canceled)

38. (Currently Amended) The ~~desktop-publishing~~ system of claim 14, wherein the user defined HTML object is created from the predefined HTML object.

39. (Currently Amended) The ~~desktop-publishing~~ system of claim 14, wherein the user defined HTML object is created from another user defined HTML object.
